Lab Manual

Name	Kishlay Kumar
Enrollment No.	92400103445
Class	5EC5
Batch	B

INDEX

Lab	Program	CO	Date	Marks				Total	Signature
				R1(4)	R2(2)	R3(2)	R4(2)	(10)	
1.	Develop Student Admission Management Module using OOP Concepts (Class, Object, Constructor, Access Modifiers).	CO1							
2.	Design Employee Payroll System using Inheritance, Interface & Polymorphism	CO1							
3.	Develop Expense Tracking Module with Exception Handling	CO1							
4.	Build Online Event Registration Portal using ASP.NET Controls S Validation	CO2							
5.	Develop Academic Calendar S Leave Management System using Rich Controls, Session S Cookies	CO2							
6.	Create Product Catalog Application using ASP.NET MVC Architecture. (Controllers, Models, Views, Routing)	CO3							
7.	Develop Feedback Management Module using MVC Layout, Partial View S Validation. (HTML Helpers, Validation, Layouts)	CO3							
8.	Develop Inventory Management Module using ADO.NET S CRUD Operations	CO4							

9.	Create Placement Dashboard using Data Controls S Crystal Reports	CO4							
10.	Build Student Management REST API using ASP.NET Core (Middleware, API, Project Structure)	CO5							
11.	Develop Smart Campus Service Portal – Feature Extension (Integrate MVC + Database + API)	CO1, CO2, CO3, CO4, CO5							

R1	Practical Performance
R2	Timely Submission
R3	Neatness S Documentation
R4	Uploaded on Git

Experiment 1

AIM: Develop Student Admission Management Module using OOP Concepts (Class, Object, Constructor, Access Modifiers).

Code:

```
using System;

class Student
{
    private int id, age;
    private string name, gender, branch, scholarship, hostel, library, status;
    private double percentage;

    public Student(int i, string n, int a, string g, double p)
    {
        id = i;
        name = n;
        age = a;
        gender = g;
        percentage = p;

        if (percentage >= 90)
        {
            branch = "Artificial Intelligence";
            scholarship = "100% Scholarship";
            hostel = "Available";
            library = "Premium Access";
            status = "Confirmed";
        }
        else if (percentage >= 80)
        {
            branch = "Computer Engineering";
            scholarship = "75% Scholarship";
            hostel = "Available";
            library = "Premium Access";
            status = "Confirmed";
        }
        else if (percentage >= 70)
        {
            branch = "Information Technology";
            scholarship = "50% Scholarship";
            hostel = "Not Available";
            library = "Standard Access";
            status = "Confirmed";
        }
        else
        {
            branch = "Civil Engineering";
            scholarship = "25% Scholarship";
        }
    }
}
```

```
        hostel = "Not Available";
        library = "Standard Access";
        status = "Waiting List";
    }
}

public void Display()
{
    Console.WriteLine("\n===== STUDENT ADMISSION REPORT =====");
    Console.WriteLine("Student ID      : " + id);
    Console.WriteLine("Name          : " + name);
    Console.WriteLine("Age           : " + age);
    Console.WriteLine("Gender        : " + gender);
    Console.WriteLine("Percentage    : " + percentage + "%");
    Console.WriteLine("Branch        : " + branch);
    Console.WriteLine("Scholarship    : " + scholarship);
    Console.WriteLine("Hostel         : " + hostel);
    Console.WriteLine("Library Access : " + library);
    Console.WriteLine("Admission Status: " + status);
}

}

class Program
{
    static void Main(string[] args)
    {
        double totalMarks, obtainedMarks, percentage;

        Console.Write("Enter Total Marks: ");
        totalMarks = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter Obtained Marks: ");
        obtainedMarks = Convert.ToDouble(Console.ReadLine());

        percentage = (obtainedMarks / totalMarks) * 100;

        Console.WriteLine("\nPercentage = " + percentage + "%");

        if (percentage < 60)
        {
            Console.WriteLine("Sorry! Admission Rejected.");
            return;
        }

        Console.WriteLine("Congratulations! You are eligible for admission.");

        Console.Write("Enter Student ID: ");
        int id = Convert.ToInt32(Console.ReadLine());

        Console.Write("Enter Name: ");
        string name = Console.ReadLine();

        Console.Write("Enter Age: ");
        int age = Convert.ToInt32(Console.ReadLine());
    }
}
```

```
Console.WriteLine("Enter Gender: ");  
string gender = Console.ReadLine();  
  
Student s1 = new Student(id, name, age, gender, percentage);  
s1.Display();  
}  
}
```

Output: Screenshot:

```
Enter Total Marks: 500  
Enter Obtained Marks: 430  
  
Percentage = 86%  
Congratulations! You are eligible for admission.  
Enter Student ID: 101  
Enter Name: KISHLAY  
Enter Age: 19  
Enter Gender: M  
  
===== STUDENT ADMISSION REPORT =====  
Student ID      : 101  
Name            : KISHLAY  
Age             : 19  
Gender          : M  
Percentage      : 86%  
Branch          : Computer Engineering  
Scholarship     : 75% Scholarship  
Hostel          : Available  
Library Access  : Premium Access  
Admission Status: Confirmed  
  
...Program finished with exit code 0  
Press ENTER to exit console.
```

Another Sample Output:

```
Enter Total Marks: 500
Enter Obtained Marks: 212

Percentage = 42.4%
Sorry! Admission Rejected.

...Program finished with exit code 0
Press ENTER to exit console.
```
